Welcome

The team at Hillcroft Farms warmly welcomes you to our 47th Annual Production Sale

Hillcroft Farms UltraWhite Sheep Stud was established in 2005 using a carefully selected blend of the highest-performing genetics available at the time. From the beginning, our objective has been clear: to develop a genuinely non-shearing, highly fertile and easy-care sheep with the growth, muscling and hardiness to perform across a wide range of Australian conditions. That objective continues to guide every breeding decision we make.

This year's sale team represents another year of measured genetic progress. All rams are presented unshorn, allowing buyers to assess their natural shedding ability. We have not shorn an UltraWhite sheep at Hillcroft Farms since 2013.

Our HFplus high-fertility genetics continue to strengthen their influence throughout the flock and are represented in greater numbers in this year's offering. As illustrated in the fertility graphs on the following pages, we believe these genetics have the potential to substantially lift productive performance

while retaining the growth, muscling, carcase quality, worm resistance, structural soundness and adaptability required in a productive commercial meat flock.

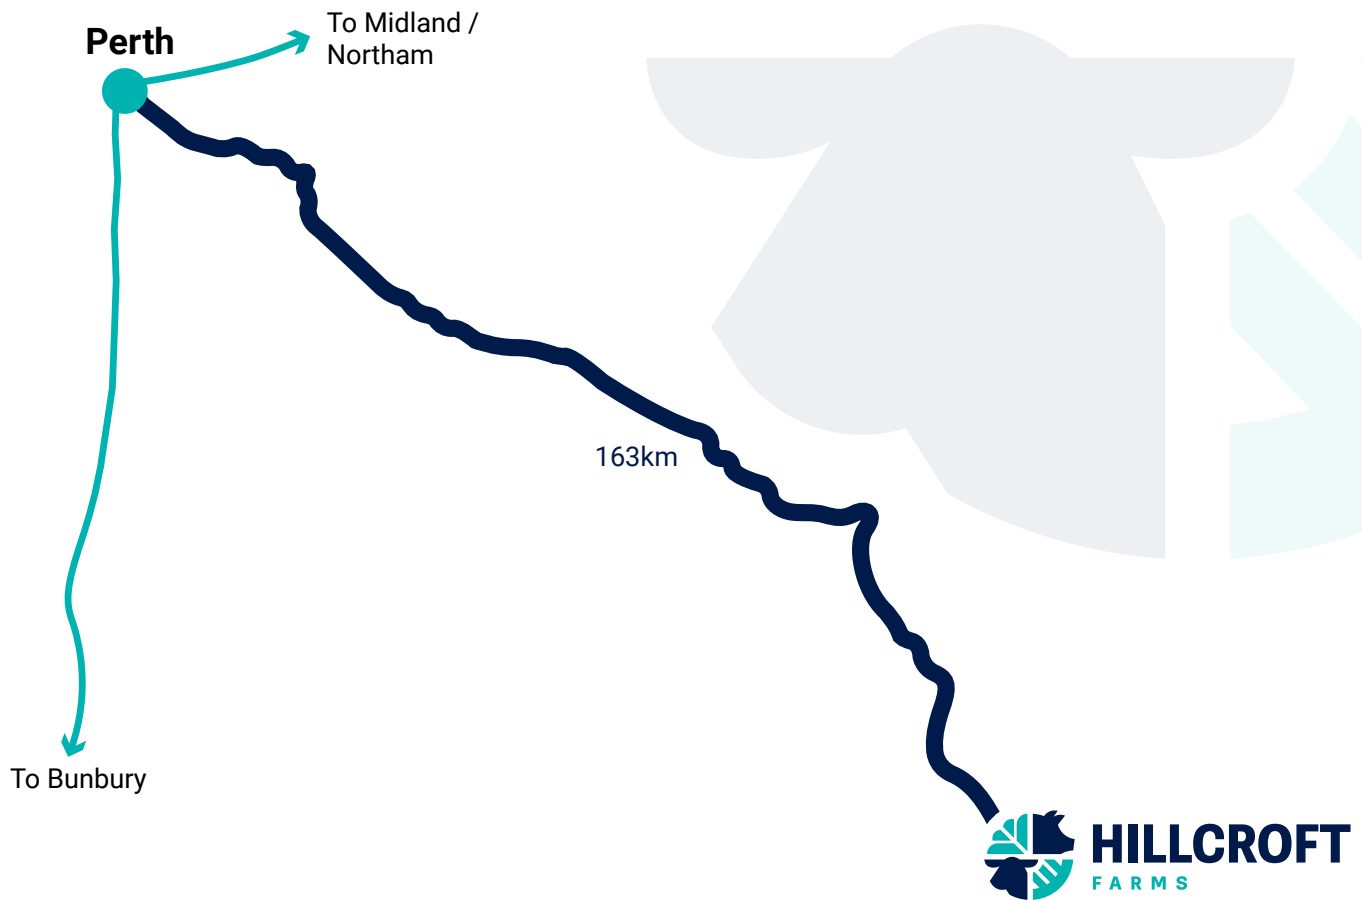

Our breeding program remains deliberately focused on the long-term development of the UltraWhite breed. Our purpose is not simply to produce rams for today's market. We use intensive selection, accurate performance recording and increasingly sophisticated genomic information to build a more complete, consistent and profitable sheep for the future.

We sincerely thank our clients, agents, staff, family and industry supporters for their continued confidence in our program. We trust the rams selected at this year's sale will make a lasting and profitable contribution to your flock.

We wish all buyers every success with their purchases and a safe journey home.

The Bradford Family

GETTING HERE

AN AUSTRALIAN FIRST IN SHEEP BREEDING

HFplus™ is a game-changing, naturally occurring variant of the GDF9 gene (known globally as the Norwegian White mutation), seamlessly integrated into Hillcroft Farms UltraWhites.

Developed over 10 years and 7 generations of rigorous backcrossing, HFplus™ delivers a massive commercial lift in flock scanning percentages without the management headaches or biological risks associated with other genetic variants.

THE STATS THAT DRIVE PROFITABILITY

+20% SCANNING LIFT

Achieved by Single-Copy Carriers (**HF+**). A highly reliable performance lift for baseline commercial flocks.

+40% TO +60% SCANNING LIFT

Achieved by Double-Copy Carriers (**HF++**), delivering up to a **60% scanning boost** depending on nutrition and flock management.

0% STERILITY RISK

Unlike the other 3 known GDF9 mutations worldwide, HFplus™ has zero genetic downsides. Double-copy ewes remain 100% fertile.

SALE INFORMATION

Sale inspections from 9am.
Pre-sale inspections by appointment always welcome.

HEALTH STATUS

All Hillcroft sheep including our rams have been vaccinated with Gudair® vaccine and are approved vaccinates. We are Ovine Brucellosis Accredited Free Flock and Foot Rot Free. Certificate number OVAC23

SEMEN POLICY

In the interests of the new UltraWhite breed, and to protect the value of client purchases, the Proprietors of Hillcroft Farms reserve all semen sale rights from rams sold at Auction. It is not the intention of the proprietors to sell semen from any of these rams post sale.

We passionately believe it will be in the best interests of the long-term development of the breed, and its ability to influence the prime lamb industry. It's important to implement these measures at this early stage of the breed. This does not in any way interfere with the ability of buying syndicates or partnership purchases to operate and share rams in the normal way.

FERTILITY

The rams testicles have been examined at classing and are guaranteed to be ready for work. Should a ram prove infertile or incapable upon veterinary inspection within six (6) months of purchase, the ram will be replaced or refunded.

PERCENTILE BANDS

Report: Percentile Bands
Analysis: SHEDDERS
Analysis date: 01/09/2026
Drop Year: 2025

GENOMICS

Hillcroft Stud has Genomic tested all stud stock since the 2014 drop.

FREE DELIVERY

Free delivery for all purchases at the auction.
Delivery to a central point will be coordinated where practical.

AUCTION

The 2026 auction will be an Open Cry auction system.

INSURANCE

Facilities for insurance will be available at the sale through WFI.

CATERING

Please join us for a light lunch which will be provided prior to the sale and for a drink afterwards.

GST

The Hillcroft Annual Production Sale will be GST exclusive. GST will be added to the purchase price prior to invoicing.

ALL ABVS ARE CURRENT AS OF 01/09/2026

ABBREVIATIONS

BT	Birth Type - (included after tag number) Single (S), Twin (T) or Triplet (TR)
BWT	Birth Weight
PWT	Post Weaning Weight - (7-10 months) a good indicator of the lamb's ability to grow after weaning to market weights
PFAT	Post Weaning Fat
PEMD	Post Weaning Eye Muscle Depth
PWEC	Post Worm Egg Count - is a genetic measurement used to predict natural resistance to worms
IMF	Intramuscular Fat - the distribution of fat within muscle, expressed as a percentage
S/F	Shear force - the genetic difference between animals in shear force required to cut a piece of meat
TCP	Total sum of all of the above, collated to a general lamb/first cross index

KEY

-  Pink shaded box represents top 5% of shedders
-  Blue shaded box represents top 10% of shedders
-  Green shaded box represents top 20% of shedders
-  * Cannot be registered

LAMBPLAN EBV's

LAMBPLAN EBV's are calculated from raw data collected by breeders and accredited LAMBPLAN operators.

LAMBPLAN does not oversee or audit the collection of this data and therefore neither LAMBPLAN nor Meat and Livestock Australia accept any responsibility for the accuracy of the data.

LAMBPLAN EBV's are designed to give the best possible estimate of true genetic merit from that data, i.e., the estimate that maximises the correlation between EBV's and true genetic merit. EBV's can only be compared between flocks or between management groups within a flock when a pedigree link exists and that link is used.

How to Register and Bid on AuctionsPlus

1

Go to **www.auctionsplus.com.au** to register at least 48 hours before the sale.

2

Select “**Sign Up**” in the top right hand corner.

3

Fill out your name, mobile number, email address and create a password.

4

Go to your emails and confirm the account.

5

Return to AuctionsPlus and log in.

6

Select “**Dashboard**” and then select “**Request Approval to Buy**”.

7

Fill in buyer details and once completed go back to Dashboard.

8

Complete buyer induction module (approx. 30 minutes).

9

AuctionsPlus will email you to let you know that your account has been approved.

10

Log in on sale day and connect to auction.

11

Bid using the two-step process – unlock the bid button and bid at that price.

12

If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:

Phone: (02) 9262 4222

AN AUSTRALIAN FIRST IN SHEEP BREEDING

HFplus™ is a game-changing, naturally occurring variant of the **GDF9 gene** (known globally as the Norwegian White mutation), seamlessly integrated into Hillcroft Farms UltraWhites. Developed over 10 years and 7 generations of rigorous backcrossing, HFplus™ delivers a massive commercial lift in flock scanning percentages without the management headaches or biological risks associated with other genetic variants.

Notes

The background of the page features a series of horizontal lines, alternating between white and a very light gray. In the lower right corner, there is a stylized illustration of a plant with large, rounded leaves in shades of light green and gray. The plant appears to be growing out of a gray, rounded base.
